

# WILDFIRE SMOKE INFORMATION

*A joint message from the North Coast Unified Air Quality Management District (NCUAQMD) and partners*

Issued: September 10, 2020  
Updated as conditions change

## **UPDATED Air Quality Public Service Announcement**

Several fires are impacting our region: Red Salmon Complex (<https://inciweb.nwcg.gov/incident/6891>), August Complex (<https://inciweb.nwcg.gov/incident/6983>), Slater Fire (<https://inciweb.nwcg.gov/incident/7173/>), Elkhorn/Hopkins Fire (<https://inciweb.nwcg.gov/incident/7071/>), and Oak Fire, as well as numerous other fires in Oregon. USFS Air Resource Advisors (ARAs) are assigned to LRA fires impacting our area, providing daily smoke outlook forecasts that advise these notifications within our jurisdiction.

Continued significant fire growth and smoke production from the fires is expected today. Significant smoke from fires in Oregon is making its way into California and may mix down depending on conditions.

Weather conditions and fire activity will continue to push smoke from southern fires (August Complex, Oak Fire, and Elkhorn/Hopkins) to impact the communities in Southern Humboldt and Trinity County. Smoke impacts are expected to be Unhealthy to Very Unhealthy throughout much of the area with some possible improvement tomorrow.

**Humboldt County** – Air Quality ADVISORY issued today for the communities of Orleans, Weitchpec, Hoopa, Willow Creek, Garberville, and Redway areas.

- Eureka – Generally Unhealthy for Sensitive Groups.
- Orleans – Very Unhealthy conditions likely.
- Weitchpec – Very Unhealthy conditions likely.
- Hoopa – Generally Unhealthy with periods of Very Unhealthy conditions expected.
- Willow Creek – Generally Unhealthy conditions expected.
- Garberville & Redway and nearby communities – Very Unhealthy conditions likely throughout the day.

**Del Norte County** – Air Quality ADVISORY was issued today for Crescent City, Gasquet.

- Crescent City – Generally Unhealthy conditions expected.
- Gasquet – Unhealthy to Very Unhealthy conditions likely.
- Klamath – Generally Unhealthy conditions expected.

**Trinity County** - Air Quality ADVISORY issued today for Hayfork, Ruth, Zenia-Kettenpom, Trinity Pines areas.

- Weaverville and surrounding communities – Unhealthy for Sensitive Groups with periods of Unhealthy.
- Hayfork – Unhealthy conditions likely.
- Ruth, Zenia-Kettenpom, Trinity Pines - Unhealthy to Very Unhealthy conditions.

Air Quality Index (AQI Value)	PM 2.5 24hr avg (ug/m <sup>3</sup> )	Actions to Protect Yourself
Good (0-50)	0-12	None
Moderate (51-100)	12-35	Sensitive individuals should consider limiting prolonged or heavy exertion
Unhealthy for Sensitive Groups [USG] (101-150)	35-55	People within USG should <b>reduce</b> prolonged or heavy outdoor exertion
Unhealthy (151-200)	55-150	People within USG should <b>avoid all</b> prolonged or heavy outdoor exertion
Very Unhealthy (201-300)	150-250	Everyone should avoid prolonged or heavy exertion
Hazardous (>300)	250-500	Everyone should avoid any outdoor activity

Particulate Matter (PM2.5) monitors are located in Crescent City, Eureka, Weaverville, Hoopa, Weitchpec, Willow Creek, Klamath, Gasquet, Trinity Center, and Garberville. Updates will be provided as conditions change.

Fire information can be found at <http://inciweb.nwcg.gov/> or <https://fire.airnow.gov/>. Current weather information can be found at [www.wrh.noaa.gov](http://www.wrh.noaa.gov).

As with all wildfires, ash fallout is possible depending on fire activity and proximity to the fires. Ash fallout information can be found in the Wildfire Smoke Resources section of our webpage at [www.ncuaqmd.org](http://www.ncuaqmd.org).

### Health Information for Smoke Impacts

Concentrations of smoke may vary depending upon location, weather, and distance from the fire. Smoke from wildfires and structure fires contain harmful chemicals that can affect your health. Smoke can cause eye and throat irritation, coughing, and difficulty breathing. People who are at greatest risk of experiencing symptoms due to smoke include: those with respiratory disease (such as asthma), those with heart disease, young children, and older adults.

These sensitive populations should stay indoors and avoid prolonged activity. All others should limit prolonged or heavy activity and time spent outdoors. Even healthy adults can be affected by smoke. Seek medical help if you have symptoms that worsen or become severe.

Follow these general precautions to protect your health during a smoke event:

- Minimize or stop outdoor activities, especially exercise.
- Stay indoors with windows and doors closed as much as possible.
- Do not run fans that bring smoky outdoor air inside – examples include swamp coolers, whole-house fans, and fresh air ventilation systems.
- Run your air-conditioner only if it does not bring smoke in from the outdoors. Change the standard air conditioner filter to a medium or high efficiency filter. If available, use the “re-circulate” or “recycle” setting on the unit.
- Do not smoke, fry food, or do other things that will create indoor air pollution.

If you have lung disease (including asthma) or heart disease, closely monitor your health and contact your doctor if you have symptoms that worsen.

Consider leaving the area until smoke conditions improve if you have repeated coughing, shortness of breath, difficulty breathing, wheezing, chest tightness or pain, palpitations, nausea, unusual fatigue, lightheadedness.

Updated guidance from the CDC is available on reducing wildfire smoke exposure given COVID-19 considerations: [https://www.cdc.gov/disasters/covid-19/reduce\\_exposure\\_to\\_wildfire\\_smoke\\_covid-19.html](https://www.cdc.gov/disasters/covid-19/reduce_exposure_to_wildfire_smoke_covid-19.html).
